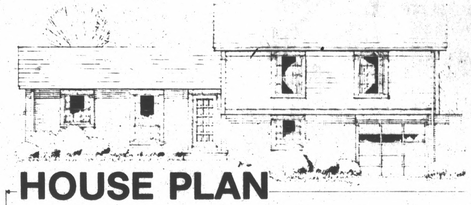
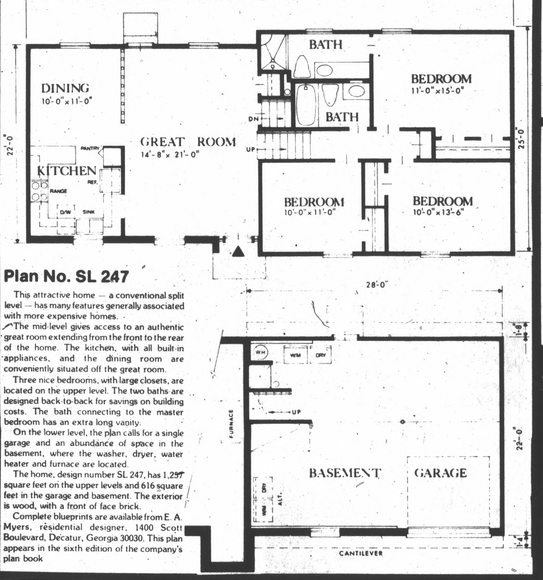
Home of the Week



HOUSE PLAN



Plan No. SL 247

This attractive home — a conventional split level — has many features generally associated with more expensive homes.

The mid-level gives access to an authentic great room extending from the front to the rear of the home. The kitchen, with all built-in appliances, and the dining room are conveniently situated off the great room.

Three nice bedrooms, with large closets, are located on the upper level. The two baths are designed back-to-back for savings on building costs. The bath connecting to the master bedroom has an extra long vanity.

On the lower level, the plan calls for a single garage and an abundance of space in the basement, where the washer, dryer, water heater and furnace are located.

The home, design number SL 247, has 1,297 square feet on the upper levels and 616 square feet in the garage and basement. The exterior is wood, with a front of face brick.

Complete blueprints are available from E. A. Myers, residential designer, 1400 Scott Boulevard, Decatur, Georgia 30030. This plan appears in the sixth edition of the company's plan book
